Terracotta

Golden Yellow

SERENE SPIRAL

A tranquil and mesmerizing pattern inspired by the harmony of spirals found in nature.

Forest Green

Peacock Blue

Golden Yellow

SURFACE PREPARATION

Freshly plastered/concrete surfaces must be allowed to cure completely for at least 12 weeks.

Ensure surface is thoroughly clean, dry and free from all loose dirt, chalk, grease or oily material, laitance, organic debris, fungi, algae and flaking paint by brushing with a wire/stiff coir brush or power tool cleaning followed by water jetting if required and appropriate surface cleaners. For repainting surfaces ensure all the old coating should be removed, any cracks or crevices present should be filled with suitable filling compounds/cement sand mixture, any seepage/dampness issue needs to be arrested appropriately before application. After cleaning, sand the surface to remove any smoothness or glossy areas using wire brush or power tool sanding. Wash with fresh water and allow the surface to dry.

SELF-PRIMING COAT

Apply a self-priming coat of JK Armour FloorPro to the prepared surface by diluting with 30-40% clean water and allow it to dry for minimum 5-6 hours.

TOP COAT

Apply 2 coats of JK Armour FloorPro with maximum of 10% dilution over the self-priming coat and allow a drying time of 5-6 hours between the coats. Curing after 72 hours of application (low traffic).
